SACHIN M.SIBICHAN

Web Developer

I'm looking to improve my skills in full stack development and already have expertise in front-end technologies like JavaScript and Angular.

Work Experience

MEAN Stack Developer Intern – LUMINAR TECHNOLAB

dec 2022 - present

Completed hands-on projects during training that enabled me to apply my skills and gain experience in building web applications and integrating APIs.

Projects

Financial Claims Portal

Build on Angular

♦ The Financial Claims Portal is an Angular web app with CRUD operations and login functionality.

♦ Employees can submit expense claims on the user side, while admins manage claims on the admin side.

♦ The web app is built with Node Express and MongoDB for a secure and efficient workflow.

♦ The Financial Claims Portal provides a modern and user-friendly interface for a streamlined expense management process.

GIT repository: Front-end   Back-end

Ecommerce Website

Build on Angular

♦ The ecommerce website is an Angular web application with a JSON Server backend.

♦ The website is designed for admin use, allowing them to add, delete, update, search, and edit products.

♦The JSON Server backend enables the ecommerce website to easily store and retrieve product data.

♦ With its intuitive interface and powerful backend, the admin-side ecommerce website provides a streamlined way for admins to manage their product catalog and ensure their ecommerce website is up-to-date and user-friendly.

GIT repository: Front-end

Bank Management System

Build on Angular

◆ The bank management system is an Angular web application with a Node Express backend and MongoDB database.

◆ Users can login and register to access the system's deposit, withdrawal, and transaction history functionality.

◆ The web application uses JWT token authentication and middleware to ensure a secure user experience.

◆ Users have the option to delete their account and log out of the system.

◆ With its intuitive interface and robust functionality, the bank management system provides a safe and streamlined way for users to manage their finances online.
